Address: **3/9 Haystacks Drive Torquay VIC 3228, Torquay, Adelaide**

Price: **3 228,00 R**

Battery Storage Solutions | Winki Energy: Winki Energy offers integrated battery storage systems designed to work seamlessly with solar power installations, providing both residential and commercial customers with reliable energy independence. From the outset, Winki takes care of the whole process—starting with a free site assessment to understand customer energy usage and specific needs, through to design, installation, ongoing monitoring and support. Their teams consist of CEC-accredited installers and licensed electricians, ensuring high standards in workmanship and safety.

For homeowners and businesses looking to reduce utility bills and become more self-reliant, Winki's battery systems allow excess solar energy generated during the day to be stored for later use—whether that's during peak pricing periods or at night. In addition to cost savings, these solutions offer peace of mind during power outages: backup systems that automatically activate so essential appliances and lighting stay on.

Quality and longevity are central to Winki's value proposition. The batteries and associated components they use are premium, come with strong warranties, and are selected for durable performance. Winki also emphasizes tailored design — matching battery size, compatibility, and long-term goals (e.g. off-grid capability) to the customer's existing solar setup to maximize return on investment.

Finally, there is a strong environmental mission behind their solutions: by enabling more
